Performance for the long run.

## GROOVED METERING RODS

# Buschman Grooved Metering Rods Last Longer And Coat More Consistently!

Buschman Dura-Flow™ grooved metering rods are roll-formed using the finest stainless steel, with custom engineered thread profiles to best suit your machine and coating application, even high percentage of solids coatings. Our proprietary manufacturing process, Dura-Flow™ technology, renders a superior rod that performs to perfection.

- **Custom engineered thread profiles. Tailored to fit your specific application. Over 25 different thread profiles and growing!**
- **Consistent coating coverage. Buschman's Dura-Flow technology reduces rod lines, streaks and defects, and in some cases decreases coating consumption.**
- **Longer rod life. Manufactured from stainless steel cores with hard chrome coating, Buschman Dura-Flow grooved rods last longer.**
- **100% input and output inspections ensure quality and consistency, rod after rod.**
- **Service you can count on —24 hours a day, 7 days a week.**

### Dura-Flow Rod Applications

- Sizer/Starch Presses
- Corrugated Coating Presses
- Adhesives for labels, tapes & decals
- Glues and clays for papers, films & foils
- Pre-coat, base coat & top coat
- Hot stamp foils & wax
- Other specialty & custom coating applications

### Dura-Flow Rod Specifications

- Material: Stainless steel
- Diameter: 6.35 mm – 38 mm (0.25-1.5in)
- Lengths: Up to 11 meters (456"). For longer lengths, contact Buschman at 1-216-431-6633
- Thread Size: Custom engineered for customer application.
- Thread Shape: Custom engineered for customer application.
- Coating: Hard chrome 0.00762 mm – 0.0508 mm (0.0003 – 0.0020in)
- Special ends: All special end configurations available

Nothing fits a Buschman metering rod better than a Buschman Rod Holder. Call us today to order the rod holders with the perfect fit.
